Persollo

front-end developer
Австралия, Канберра

Обязанности и достижения

Main Frontend developer on project. Other developers were Backend Ruby on Rails developers. HTML5, CSS, Gulp builder with Autoprefixer

and images optimization, JavaScript, jQuery, Bootstrap, Git. Due to increasing codebase were made decision to refactor a part of project to Angular JS. Because of it I started to learn Angular JS but didn't have ability to use it because startup were closed. Vagrant were used as main development environment on project.

О себе

I am fast learning developer. I prefer to learn new technologies, it's pros and cons, and check if it possible to

use it on project to improve productivity of developers and maintainability of project. I am interested in learning

best practices of application development and new cool technologies like Angular JS, TypeScript and ES 2016

because it allows me to create amazing applications with clear code and architecture.
